A Visit to Our Nursery Sales Yards off Paterson Avenue in East Rutherford should prove to be pleasant, profitable and informative

It is impossible to list all the plants we grow. The larger trees, specimen evergreens and shrubs that require transplanting with a ball of earth, are mainly for local sales; it is obvious why it is not practical or economical to transport them any distance by rail. Come see them.

HEADQUARTERS FOR

TAXUS (Yews), RHODODENDRONS, HARDY AZALEAS, JAPANESE HOLLIES and many other useful and decorative slow growing evergreens for every place and purpose; as well as Shade Trees, Flowering Trees, Fruit-Trees and Shrubs. Plants are freshly dug to insure safe transplanting.

TAXUS cuspidata. Japanese Yew. A very desirable low evergreen with a spreading habit.

T. cuspidata capitata. Upright Japanese Yew. Excellent to accent corners and outstanding for hedge or specimens.

T. cuspidata Wardi. Spreading Japanese Yew.

T. media Andersoni. Erect growing.

T. media Browni. A popular variety with dark green foliage. Very dense habit.

T. media Hicksi. Narrow form; good dark, glossy green foliage. Use as accent plants.

TSUGA canadensis. Canadian Hemlock.

NOTE: None of those evergreens are for shipping. All are for local "Cash and Carry" sales or truck delivery by special arrangement.

Plant this fall while stocks are complete, plants fresh, and the ground warm and workable to receive them. Plant this fall and enjoy next spring.

TAXUS cuspidata capitata

PYRACANTHA coccinea Lalandi. Laland Firethorn. A spectacular shrub, having clusters of white flowers in late spring and garbed with orange-red berries in the fall. A most effective shrub for wall or foundation planting. Pot-grown, \$2.75 each.
